# THE MOST COST EFFECTIVE DRYER

UNATTENDED TROUBLE-FREE OPERATION

WITH BEST QUALITY PRODUCT

## Field Demonstrated Performance

Usual Features:

- Reliable, essentially unattended operation with all product on Spec
- **Safe operation** without inert gas blanket
- **Dustless** Operation (no dust to surroundings)
- *No Dry Material Back feeding*
- **Odorless**, dustless, uniformly dried **product**
- Odorless operation (for most sludge drying applications)
- Meets criteria for making **“Class A”** Bio-solids
- **Lowest operating cost**
- High on-stream time – often runs for years without shutdown for any reason
- Low maintenance: usually less than 1% of the capital cost per year
- High thermal efficiency
- Lowest horsepower demand of any continuous dryer
- Automatically adjusts to varying feed rates
- Easy start-up (usually 1-2 days)
- Smallest foot print
- Accurate scale up
- Precise temperature control
- Cooling section on the bottom available
- Outdoor or Indoor installation
